

Wireless label printer GT3000

Wireless label printer

The Bluetooth wireless label printer GT3000 supports Bluetooth direct connection to iOS and Android systems. It supports Verma continuous labels, die-cut cable labels, and F-type cable labels, suitable for professional fields. Through function setting, batch printing serial number labels, bar code labels, etc., greatly shorten the working time, and is an indispensable helper in integrated wiring!

Mainly used in electric power, communication, medical experiment, energy, business office and other fields. Visual cable management has now become an important part of the overall solution for the computer room or power cabinet.

APP蓝牙连接操作打印, 告别繁琐按键输入打印

Wireless label printer
