

Handheld label printer GT2000

Handheld label printer

Hand-held portable label printer GT2000, smart and portable, effectively solves the problem of workers in the field of construction, such as industrial, electric power, and communication room, making labels.

GT2000 labeling machine has multiple printing modes such as continuous printing, continuous printing, and mirror printing. At the same time, according to specific needs, it is equipped with label tape consumables of different label types, widths and colors. In order to facilitate the staff to save at any time, the VariMark GT2000 label printer can store 20 files. The staff can save the commonly used equipment identification label types, and when they need to print, they can directly call the print.

The Verma label has the characteristics of waterproof, oil-proof, high and low temperature resistance, is not easy to fall off, and can be stored for a long time. Provide efficient visual management for industrial storage, power communications, fixed assets and other fields.

Handheld label printer

Specification
